

# Solutions AS400

## Maintenance and Support

At Samdisha we like to think that we know the IBM AS/400 or I-series better than anyone else. Some of our folks have been around this most successful of IBM products, since it's inception. We even have people who have been called into help clients of IBM itself. From RPG to COBOL, from JDE to BPICS, we have a fantastic breadth of experience an applications. From DFU to SSP we know the AS400 literally from the in-side out.

Here is just a partial list of our AS/400 solutions and services:

- RPG programming
- RPG version upgrades
- Cobol -programming
- Conversions from Cobol to RPG
- RPG indicator usage cleanup
- System/36 or S/38 conversions to AS/400
- Structure charts
- Language training
- BPCS
- MAPICS
- SAP
- INFINIUM
- BAAN
- System and programming documentation
- S/36 RPG II to RPG/400
- S/36 OCL to AS/400 CLP
- Externalizing Files (PF & LF)
- S/36 Cobol to Cobol/400
- Restructuring S/38 & AS/400 Code
- Indicator usage cleanup
- Complete Documentation of existing code including Action Diagrams, English, Specifications, Structure Charts, and Side-by-Side code and Structured English. IBM Mainframe and PC-Based Development of Mainframe Applications

IMS, DB2, CICS , ISPF, XPEDITER, MVS

COBOL, COBOL II

XDB(for DB2), SEEC COBOL Analyst

Using Microfocus COBOL/2 and the workbench, CICS Emulation
